

Commemorate a loved one, event or accomplishment with a Legacy Tree!

One of the kindest ways to commemorate someone special is to plant a tree in their honor. Montgomery Trees facilitates this through our Legacy Tree Project.

The Legacy Trees program offers the planting of a 2.5 inch caliper tree and installation of a custom-engraved granite plaque on public property (such as a park or street right-of-way), or at a church or public institution by special arrangement. This wonderful memorial and investment in the future is available for \$275.00.

Each Legacy Tree is maintained throughout its lifetime and falls under the care of Montgomery's urban forester. In addition to adding to the beauty of the city, these trees help us care for our environment by purifying the air we breathe and the water we drink.

Commemorating someone with a Legacy Tree honors them by making a lasting aesthetic and environmental improvement for us all to enjoy.
